

# VROOM!

Your AI Boardroom.

Instant Strategic Decisions.

Open Source | **BYOK** | Built for **Everyone**

Made with **GAMMA**

# Strategic Decisions Are Broken

## For Big Companies

- Weeks of back-and-forth between stakeholders across departments
- £40,000+ consultant fees for strategic analysis and recommendations
- Fragmented input scattered across endless meetings and email chains

## For Everyone Else

- Zero access to expert strategic analysis
- Critical decisions made in complete isolation
- No guidance on life-changing choices: starting businesses, buying property, expanding internationally

❏ **The Gap:** 99% of people lack access to strategic decision support when they need it most.

# Multi-Agent AI Orchestration

Vroom is a platform where specialised AI agents collaborate like a boardroom to analyse decisions from every angle. Think CFO, Legal Counsel, Strategy Director, and Tech Lead—all deliberating together in minutes.

## Bring Your Own Keys

You control costs, data, and AI providers. No vendor lock-in, no markup.

## Open Source

Free, transparent, and community-driven. Built in public, for everyone.

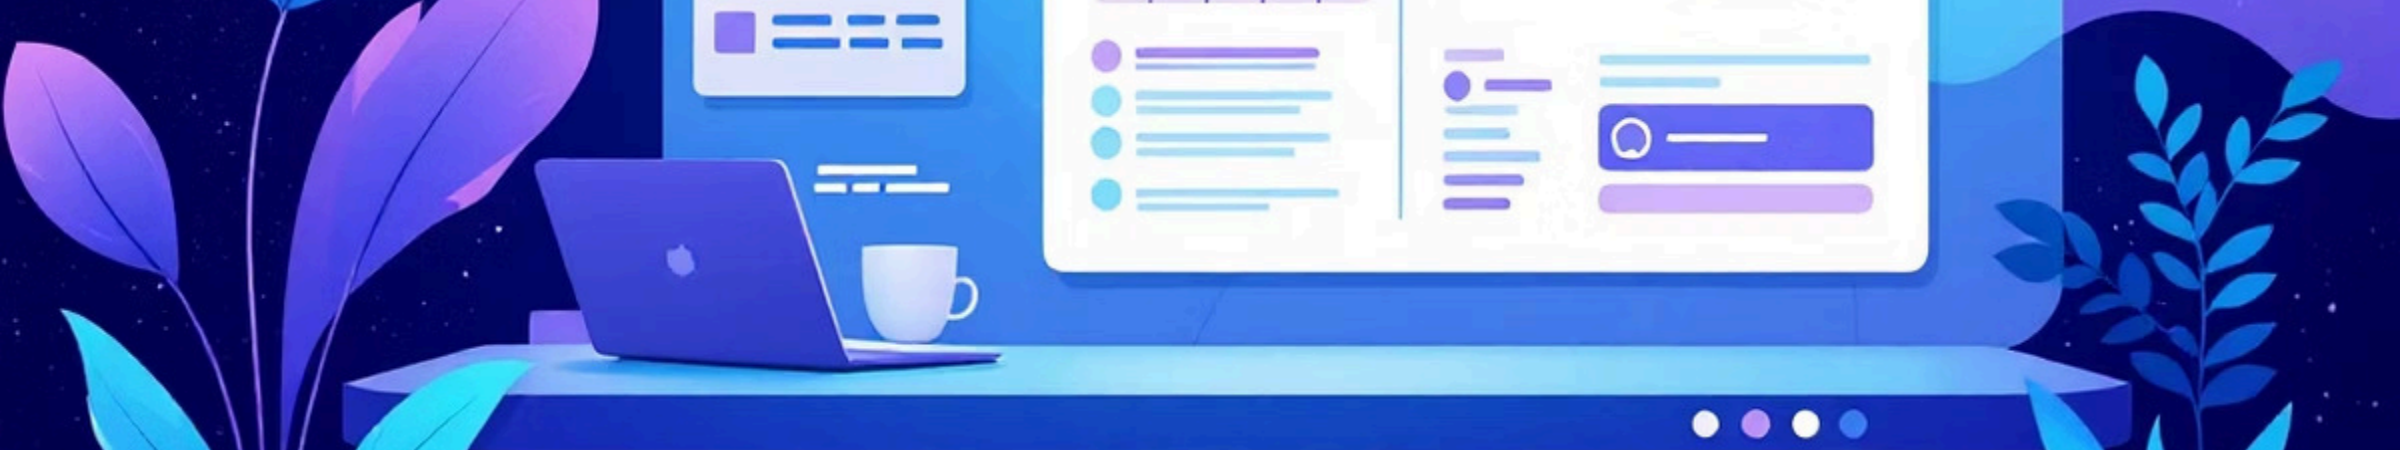

## Agent Orchestration

Not one AI, but a team of expert agents working together seamlessly.

The result? Comprehensive analysis in minutes, not weeks. CFO Agent + Legal Agent + Strategy Agent + Your Input = Strategic clarity when you need it.

# Three Steps to Strategic Clarity

01

## Configure Your Agents

Create expert agents with specialised system prompts. Use OpenAI, Anthropic, GreenPT, or in-house models via your own API keys. Set up once, use forever.

02

## Start a Room

Choose pre-built templates like Market Expansion or Product Roadmap, or create custom rooms for any decision. The system orchestrates the deliberation automatically.

03

## Get Actionable Results

Receive multi-perspective analysis in minutes with clear recommendations and action items. Export to Notion, ClickUp, or PDF and take immediate action.

# From CEO to Solopreneur

Vroom brings expert AI analysis to every decision-maker, regardless of company size or budget.

## Enterprise Executive

**Question:** "Should we expand to the DACH region?"

**Agents:** CFO + Legal + Strategy + Marketing collaborate on risk analysis, budget forecast, and compliance checks.

**Result:** Go/No-Go decision in 10 minutes versus 2 weeks of meetings.

## Solo Entrepreneur

**Question:** "Should I open a Partita IVA if I make X a month as a side gig?"

**Agents:** Financial + Legal + Tax agents provide cost breakdown, implications, and next steps.

**Result:** Confidence to make an informed choice about business registration.

## First-Time Homebuyer

**Question:** "How do mortgages work in Italy?"

**Agents:** Financial + Legal agents deliver clear explanations and pitfall warnings.

**Result:** First-time buyer becomes informed and empowered.

# Why BYOK Matters

Control. Privacy. Sovereignty.

## Cost Control

- No platform markup on AI costs
- Pay only your provider directly
- Scale without vendor lock-in
- Enterprise decisions at startup costs

## Data Protection

- Your keys mean your data stays with your provider
- No third-party storage of sensitive decisions
- GDPR and compliance ready out of the box

## AI Sovereignty

- Use any compatible AI provider
- Future: Ollama and in-house models
- True freedom and flexibility for your organisation

📄 Bring Your Own Keys isn't just a feature—it's our philosophy. Enterprise-grade decision support with complete control.

# The Agent Orchestration Advantage

Traditional AI gives you one perspective. Vroom orchestrates multiple expert agents, each with specialised knowledge, to deliberate together like a real boardroom.

Each agent brings domain expertise. Together, they provide comprehensive analysis that no single AI could deliver.

# Real Impact, Real Numbers

**10min**

## Decision Time

From weeks of meetings to minutes of AI-powered analysis

**£0**

## Platform Markup

Pay only your AI provider directly—no hidden costs

**100%**

## Data Control

Your keys, your data, your sovereignty

**∞**

## Use Cases

From market expansion to mortgage questions—limitless applications

# Vision & Roadmap

Democratise strategic decision-making for every person on Earth
